Importo disponibile per le sovvenzioni: 71069 USD

Num.	Distretto/Club	Tipo di attività	Descrizione dell'attività	Località dell'attività	Importo preventivato (USD)
1:	Alta Valdelsa	Salute: generale	Permanent employ of two disabled young people in comapnies: support each disabled for 6 hours a week by specialist	Italia	1400
2:	Carrara-Massa	Salute: malattie	This project proposal stems out from the intent of joining the forces of Rotary Club Carrara e Massa, Rotary Club Marina di Massa Riviera Apuana del Centenario, and Rotaract Carrara e Massa (District 2071, Italy) in support of LILT efforts both in information and in diagnostics. More in detail, the project activities, jointly carried out by the abovementioned clubs and the LILT, consist in the purchase of one portable ultrasound for the LILT section of Massa Carrara, in a capillary diagnostics campaign in the territory of the province, including small cities, and in a series of conferences about cancer hazard and prevention to be held into schools and communities. The project will start with a public event during which the instrument will be delivered to LILT (about Sept. 2017) and will end with an interclub event (in Spring 2018) during which LILT will illustrate the results of its campaigns and activities against cancer.	Italia	4260
3:	Cascina	Educazione: generale	About the topic of the historical-cultural valorisation of the Carthusian monastery of the "Certosa di Calci" the directress Antonia d'Aniello with the director of the naturalistic museum prof. Roberto Barbuti have undertaken inside the monastery. For this reason Cascina's Rotary has already present at the valorisation of the monastery wants to coordinate a project and a financial plan with the aim to execute operationally of this will. This fresco was detached from its originary position on the north side of the forestry a priority of the cloister and then collocated inside the monastery's stores so that we lost any traces of it. The refaunding of this work as offered the chance to valorise a wing of the monastery related functionally to the historical-naturalistic museum's direction on the cloister of the forestry as priority and the cell of the prior with chapel. This work wich represents the founder of the conthusion order as been painted by the painter Giarrè, who as done many of fresco and paintings of the Certosa. The project provides the realisation of a structural strut of the fresco with suitable material to be exposed in a showroom of the forestry and bring back to vision in the "Quadreria" where expose several pictures and prints lyng in the monastery's stores	Italia	4283
4:	Casentino	Educazione: generale	The project aims to provide the new generations with the knowledge and professional experience of the member in favour of high school students, to bring the real world of work closer to the world of study at school. 10:	Firenze Sud	Educazione: servizi di volontariato	<p>This Project is the joint effort of the 5 central clubs of Florence: Firenze Sud, Firenze Nord, Firenze Est, Firenze Ovest and Firenze. The service Club is Firenze Sud In the light of the constant focus of Rotary International on Projects about Hunger-relief and against Food Insecurity, this Project aims at granting TwoWalk-in Cold (Refrigerating) Rooms to the major Non-profit Organisation in Florence, Associazione di Volontariato Solidarietà Caritas - ONLUS - Via dei Pucci 2, Firenze, which provides free daily meals for around 2000 persons in 5 Refectories (2 main and 3 minor) in town. The goal is to let the Caritas to have access to fresh food and cooked food in excess, which after refrigeration, needs to be stored away. The Project may be considered as the continuation of a previous one, where the same Organisation (Caritas) was granted a Blast chiller refrigerating machine by RC Firenze Est. The Cold Rooms allow the storage for many days, and the use of the food wherever and whenever needed.</p>	Italia	3824
11:	Firenze Val Di Sieve	Salute: malattie	<p>Early diagnosis is the main weapon in the fight against cutaneous melanoma.. Melanoma affects both sexes and all ages: therefore, a population-based prevention activity can not be restricted to limited categories but should be extended to the entire population. Primary prevention can be achieved by avoiding excessive solar exposure: sunburn before puberty is the main environmental cause of skin cancer. Rotary Club Firenze Valdisieve has been actively involved in this field for years to guarantee effective primary prevention activities in secondary schools. Secondary prevention (early diagnosis) of tumors is preferably carried out with population screening, with the aim of detecting early melanoma. In addition, Rotary Club Firenze Valdisieve has been conducting free adult visits for a week a year. The Project for A.R. 2017/2018 will be divided into two phases: 1- "SOLE e RAGAZZI" This primary prevention project will be aimed at teaching children / teenagers simple rules to get the most out of the sun, protecting themselves from the damaging effects of excessive and incongruous exposure. 2 - "CONTROLLA LA PELLE PER SALVARE LA PELLE" This project aimed at the adult population will be intended to give the population the opportunity to undertake a free dermatological examination of the skin lesion, identifying any possible risk lesions present and subsequently subjected to surgical removal and histological examination. During the first week of May, the so-called "Week of melanoma", a group of dermatologists will conduct an educational campaign with interactive lessons on the risks of ultraviolet radiation and how to protect and maintain the skin in a state of wellbeing on middle school children Identified. During the same week, in the afternoon, dermatologists themselves will make free visits to the population too, at the localized premises and made available to the community by local councils and / or mutual assistants. Such secondary prevention activities in the fight against melanoma and skin cancers will continue throughout the year, with the possibility for the population to make free dermatological prevention visits one day a month in the municipalities involved in the initiative. This continuation will keep the population high in attention to early diagnosis of melanoma and offer a free oncology prevention service throughout the year, not just during the Week of melanoma. At the same time it will allow a good range of people to have a regular check-up period.</p>	Italia	1164
12:	Grosseto	Educazione: generale	<p>The Rotary Club Grosseto intends to establish some scholarships for the scientific research on the matter "Thermal waters, Spa, Hydrotherapy". The main purpose is to promote and support the research on the matter chosen encouraging the education of the young generations, assigning the rewards for studies and research focused on Grosseto district. The main goal depends on the necessity to increase the knowledge on Thermal Waters focusing the attention on the following items: historical function of the Thermal Waters in Grosseto District geology and characteristics of the thermal water hydrotherapy industrial exploitation history and science of spa therapy situation of spa in Tuscany Region and Grosseto district reasons for the crisis of spas prospects for regulatory change on spa treatments the economic role of the health and wellbeing tourism linked to the tourist offer Timing: project start the 30th of July 2017 — project completion november 2017</p>	Italia	1397
13:	Grosseto	Educazione: servizi di volontariato	<p>General health, Inclusion of teenagers with disabilities with other teenagers through a residential Campus. "InterHabile" Today's society often depends on values related to the desire for success, consumerism, image and two somewhat antagonistic groups, especially among adolescents, can be identified. On one side there are the "able" who as they grow up adapt more and more to the demands of society. On the other side there are teenagers who are "differently able" and who, in the same society, are often an unsettling presence. Our intention is to create an integration between the two adolescent groups (15 "disable" teenagers and 15 "able" ones) in order to be able to bring together different identities in the same context: a residential campus of one week at Monte Argentario, Tuscany, at one WWF farmhouses, offering all involved the chance to enrich and improve themselves through a mutual exchange of different skills. Our aim is to try to promote a system among teenagers with difficulties in their personal and social autonomy, of improving relationships with others, so that they will feel themselves part of a community in which they are able to carry out actions, play and make choices whilst seeing their own role and their own identity totally accepted. We'll organize laboratories where they can work with clay and wood improving their manuality eliciting their inclusion. At the same time we'll try to offer to "able" youngsters the chance to meet and get to know the world of disability in its various forms, in a protected environment where tolerance and empathy reign.</p>	Italia	3331

14:	Isola D'elba	Educazione: generale	<p>The High School "R. Foresi" of Portoferraio has opened a section dedicated to the Applied Sciences which has already many students for next year. Now, the Institute has set up a small unsuitable lab. The Rotary Club Isola d'Elba, with the help of the Rotary Foundation, would like to give its contribution to the creation of a real laboratory of Chemistry, Earth Sciences and Biology. In the study of all experimental sciences, it is crucial to give priority to the understanding of how sciences works rather than knowledge, and start to develop a critical thinking and a rational attitude. The project would introduce in Elba Island the "Inquiry-Based Science Education" (IBSE) method, which aims to engage students and to show, to explain and to evaluate evidences. Students will record their data, analyze their results by building graphs, formulate hypotheses and also communicating results to an outside audience. Our project will have an important resonance that allow us to show newly our closeness to young students, culture and education. Moreover a dedicated plate will be affixed in our honor.</p>	Italia	670
15:	Livorno	Salute: generale	<p>The project grant, "La Casa" will benefit a non-profit organization based in Quercianella, Livorno, named "La Casa" in charge of providing assistance, hosting at its headquarters in Quercianella, subjects self-sufficient with serious chronic conditions, often of cancer, associated with social distress and with serious economic problems. La Casa" project consists of several activities, as shown below:</p> <ol style="list-style-type: none"> <li>1. Purchase a compact car in order to have a means of transportation to take guests in the case of a medical or oncological therapies. The car should also be used to carry out normal administrative practices of the guests and the association's needs.</li> <li>2. Psychological support. The association's guests usually have a very delicate psychological situation, not only for the disease, but also for their condition of extreme social unrest. The activity is therefore open to the guests, but also to the staff and volunteers of the Association. In particular, the course is designed for guests to encourage their lives in a family friendly and supportive atmosphere. At the same time it is aimed at operators.</li> <li>3. Occupational therapy. The activity is intended to act on the maintenance of host's residual abilities, but in particular the aim is to experience a community life of sharing, of occupations and feelings, so going to break the loneliness and sense of abandonment.</li> <li>4. Music therapy. Music and music therapy should stimulate the existential dimension of offering guests a space that allows to process the pain and suffering, and allow you to start a process of change and transformation.</li> </ol>	Italia	4874
16:	Livorno Mascagni	Educazione: alfabetizzazione	<p>The project envisages completion of a training course and activities for disadvantaged social reintegration</p>	Italia	1400
17:	Lucca	Salute: generale	<p>In the period 2017/18, the Rotary Club of Lucca aims to give a contribution to some of the major health problems that are present in the territory of Lucca. As the local media have reported almost daily, there are some problems related to the long waiting times that citizens are suffering from in the First Aid departments of Lucca (S. Luca) and Castelnuovo di Garfagnana (S Croce). Rotary Club di Lucca wants to offer a small help to reduce this criticality situation giving some monitors for displaying the vital parameters that, as determined through preliminary meetings with Hospital executives, are the primary needs of both departments. With this project we will quickly respond to these needs (which requires more time for ordinary roads) and above all give citizenship a signal of interest and participation in this problem. Estimated date for start of project 01/07/2017 Estimated date for completion of project 31/12/2017</p>	Italia	2330
18:	Massa Marittima	Educazione: alfabetizzazione	<p>For years the club has a strong synergy with the "B. Lotti" High School of Massa Marittima. Since many years, in fact, the cultural prize allows the our Club to reward excellent students in various disciplines. In this institute the food and wine course is becoming more and more important for the territory as well. A few years ago we contributed to the setting up of the kitchen lab. The Institute now intends to pursue a new project that we think it is appropriate to contribute, what it sees to the realization of elementary school, a restaurant room. This hall will be used for the hospitality of conference participants or in any event for participants in events organized by the same school that will be able to put their students to work and create an opportunity for teaching and ground implementation with practical practices to prepare the best Students to a suitable professional future. For the outfitting of this room you will need to purchase N.2 furniture with accessories. Our Club itself will use this facility at the premiere culture 2018, devoted precisely to the excellence of the course of food and wine. It is estimated that the completion of the hall will be completed by November 2017 and only to such extent will we provide the material.</p>	Italia	590
19:	Montecarlo-Piana di Lucca	Educazione: generale	<p>The main aim of this district Grant is to create a playground where children can play together. It will be a meeting point not only for children but for their families too, particularly for those that don't have their own garden to play in. The municipality of Capannori is large, with more than 47.000 people. This area is meant to be a meeting point and an intercultural zone: we point out Capannori counts citizens of many different countries, happily well integrated among themselves.</p>	Italia	1550
20:	Monte Argentario	Salute: generale	<p>In Italy, 60,000 people die every year of cardiac arrest, often suddenly and without any symptoms or premonition. Therefore, the Community's awareness of prevention plays a key role. Il Progetto "Monte Argentario Comune Cardioprotetto" The project "Monte</p>	Italia	1630

Argentario Comune Cardioprotetto" was born as the project of early defibrillation "Open Public" in the territory of the Municipality of Monte Argentario, with the aim of preventing sudden cardiac death. The project is divided into three main areas: - the installation of a semiautomatic network of defibrillators in the city's strategic points, based on the concept of "Open Public AED": the defibrillators will be placed with public access to all citizenship in order to allow timely. Defibrillation on the ground by all the sanitary and lay personnel, formed in such resuscitation maneuvers. - the formation of lay personnel in order to ensure the widest number of available early defibrillators, thanks to volunteering associations in the area, in particular the Mercy of Porto S. Stefano as part of their project 'I am at heart -Raising awareness of the importance of primary and secondary prevention of sudden cardiac death through meetings and courses in the community. The main goal of the project is to intervene with resuscitating maneuvers and early defibrillation within the first minutes of cardiac arrest, irrespective of where the event occurs. This, in order to limit or even cancel the tragic consequences of heart arrest. Timing. The project is multi-yearly. It has been purchased a first defibrillator in April 2017 and will be completed for today's stated goals over a maximum of 4 years. As for the first year to which this subsidy application refers, the goal is to install 2 defibrillators within 6 months of the initiative's approval.

The project consists of a training course of a nephrologist, dottor roberto fanelli, in order to establish an ultrasound diagnostic service, inside the nepron-dialysis department of the mugello hospital, in borgo san lorenzo. The goal is to service patients of the vast area of mugello, avoiding them to go to the Florence's hospital. The training course will be held at the "Sant'Anna school of advanced studies" of Pisa; it will last a year, with 420h of technical training in class and 330h of distance learning course. The subscription fee is 5.000,00 euro. At the end of the training course, the results will be presented and explained to the local doctors of gneral medicine, local authorities, but, above all, to the people of mugello in an important event, that will be organized in a great contest.

The project involves the purchase of an echograph for the Orbetello Hospital

The project aims to contribute to the "Break the Barriers" program pursued by the ABF Andrea Bocelli Foundation for the island of Haiti, which aims to support and promote projects that help the weakest sections of the population in Italy and in the countries developing. In particular, the Rotary Club Pisa intends to contribute to improving the socio-economic conditions of students and families of communities targeting interventions, assisting the implementation of the subprogram Edu Project, aimed at converting some street schools in functional and safe buildings, which have access to children from the poorest families who can not afford to pay for public schools. ABF schools and school programs are organized by a Central Educational Committee which monitors the work of local committees set up at each school in order to ensure that the level of education is equal to that offered by the national and international standards. All ABF schools are recognized by the state as well as teachers who regularly attend upgrading and training courses. The structure of ABF schools usually includes lecture halls, executive offices, computer room, library, dining room, kitchen, pantry and playground. Basketball can be done where possible. ABF schools are also equipped with electricity through a solar panel system and a generator to support additional energy. For more details please refer to the brochure for presenting the program in question by the ABF Foundation. To this end, the Rotary Club Pisa intends to purchase and make available to the two schools St. Rapahael, in the community of Davarenne, and Manitane, in the community of Dame Marie, educational materials made up of furniture designed for the classrooms, and in particular some work desks and chairs for over 150 students classrooms.

"The charge of social media grandparents" is a intergenerational project promoted by Rotary Club Pisa Galilei with support and encouragement of the City of Pisa. This project aims to improve the digital illiteracy that afflicts people over 65 years. To do so an experimental training course held by students of Pisa will be set. Students will teach their fellow citizens over 65 digital communication and how to use Internet and social media. With this project, the Rotary Club Pisa Galilei intends to promote intergenerational education, lifelong learning without limits between generations but understood only as an exchange and gift between people.

Bullying is an increasingly compelling social problem investing critical areas within some young people critical social environment such as secondary school. It represents a very troublesome phenomenon underlying social behavior in this critical age phase fundamental for the complete personal psychological maturation of the individual. Along the two previous years, 2015-2016 and 2016-2017 our started with a project dedicated to promote a campaign to give information, within a first level secondary school in our city, on this topic, particularly related to the actual forms by which this phenomenon spread among the young people, mainly due to the ever and ever more diffuse use of the web and social media, a condition for which the term "cyberbullying" has been coined.. What already done foresees ending of the project in 2017-2018, with the final aim to increase awareness of the problem among students, their families and the teaching staff, profiling psychological characteristics of the bullies and their victims, this in turn relevant to plan

21:	Mugello	Educazione: borsa di studio	Italia	2340
22:	Orbetello-Costa d Argento	Salute: generale	Italia	11170
23:	Pisa	Educazione: generale	Haiti	940
24:	Pisa Galilei	Educazione: alfabetizzazione	Italia	940
25:	Pisa Pacinotti	Educazione: generale	Italia	2800

those strategies to counteract at the best this phenomenon, in such a way helping the mobbed person and make them not to feel alone. The following steps will be achieved:  
1) distribution of printed material in the School 2) debate the issue, with the support of specific professional figures, such as psychiatrists and psychologists, as well as teaching staff and parents 3) administration of a dedicate questionnaire and ask students for a written document to evaluate the results over the time of the information and sensitization campaign. 4) to award best papers 5) dissemination of the initiative on newspapers and TVs, 6) final event opened to institutional authorities and, finally, 7) awarded competition between participating students with a written or design opera and picture exhibition on the topic. Estimated data for project start: 1st of October 2017, estimated data for project completion: 30th of May, 2018

26:	Pistoia-Montecatini Terme	Educazione: alfabetizzazione	The project plans to create a 55-page comic book about Paul Harris's life to be taught in high schools to get to know Rotary.	Italia	3260
-----	---------------------------	------------------------------	---	--------	------

27:	Siena	Salute: generale	Our service is intended to facilitate the solution to a difficult problem that affects people with motor disabilities, in our town. As a matter of fact, the Municipality of Siena, in the resolution n.66 of March 2, 2017, has the same goal of our service. The Rotary Club Siena project consists in the transformation of a taxi owned by COTAS (Consorzio Tassisti Senesi) in a vehicle suitable for transporting disabled people even the ones on electric wheelchairs. The vehicle fitted as above, will remain available in a main square of Siena (Piazza Matteotti) available exclusively for disable people; once that a request arrives to the COTAS contact centre, the first free driver will board the vehicle, will perform the requested service and will return to the checkpoint, leaving the taxi available for future demands. Giving to our service the greatest importance, the Municipality of Siena has already approved the release of two taxi licenses for this initiative, one of which is immediately operative. The agreement between the Rotary Club Siena and the COTAS (as you may see from the letter of intent attached to our request) testifies the absolute importance of our service, its relevant impact on our territory, and the visibility of the Rotary's contribution, which will be testified by the serigraphs attached to the vehicle and by the circulation of the vehicle in our city. Estimated beginning of our service: July 10, 2017. Estimated service completion: September, 15, 2017.	Italia	3840
